### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: nonelected claims without traverse 3-14 have been canceled.

### REASONS FOR ALLOWANCE

2. Claims 1-2 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a display device comprising a combination of various elements as claimed, more specifically, a driving circuit connected to the signal line and, in a region other than a display region constructed by the pixels, directly mounted on the insulating substrate, wherein a warp amount of a portion corresponding to the region in which the driving circuit is mounted, in a face opposite to the side of the insulating substrate, on which the driving circuit is mounted, is 2 um or less.

Amagi ('008) discloses a printed wiring board comprising an insulator adjusted for suppressing warping deformation. However, Amagi fails to disclose a display device comprising a combination of various elements as claimed, more specifically, a driving circuit connected to the signal line and, in a region other than a display region constructed by the pixels, directly mounted on the insulating substrate, wherein a warp amount of a portion

corresponding to the region in which the driving circuit is mounted, in a face opposite to the side of the insulating substrate, on which the driving circuit is mounted, is 2  $\mu\text{m}$  or less.

Nishino ('408) discloses a liquid crystal display device comprising a driving circuit, a substrate with a particular warping amount. However, Nishino fails to disclose a display device comprising a combination of various elements as claimed, more specifically, a driving circuit connected to the signal line and, in a region other than a display region constructed by the pixels, directly mounted on the insulating substrate, wherein a warp amount of a portion corresponding to the region in which the driving circuit is mounted, in a face opposite to the side of the insulating substrate, on which the driving circuit is mounted, is 2  $\mu\text{m}$  or less.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
